LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
BUREAU OF STATISTICS,
Washington, D. C., June 30, 1909.

SIR: I have the honor to transmit herewith a compilation of the statistics of the imports of farm products into the United States, beginning with the fiscal year 1851 and ending with 1908, derived from the reports on The Foreign Commerce and Navigation of the United States, published by the Department of Commerce and Labor.

This is the only exhaustive presentation of these returns in a single report, and should be published because of its permanent value to the Department of Agriculture and to the agricultural history of the United States. The compilation was made under the direction of George K. Holmes, Statistical Scientist in charge of the Division of Production and Distribution.

It is respectfully recommended that this manuscript be published as Bulletin No 74 of this Bureau.

Very respectfully,

VICTOR H. OLMSTED,
Chief of Bureau.

HON. JAMES WILSON,
Secretary of Agriculture.

EXPLANATION OF TERMS.

IMPORTS.—Goods from a foreign country entered at a custom-house.

IMPORTS FOR CONSUMPTION.—The term “entry for consumption” is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

FOREIGN EXPORTS OR REEXPORTS.—Goods which have been imported into this country, either for reexport or for consumption, and are afterwards exported, having undergone no change in form or condition or enhancement in value by the application of labor in the United States.

DOMESTIC EXPORTS.—Goods produced or manufactured in this country from either domestic or imported raw materials and which are shipped to foreign countries.

TRANSIT OR IN-TRANSIT TRADE.—Goods from a foreign country passing through the United States on the way to the same or another foreign country.

TRANSSHIPMENT TRADE.—Goods from a foreign country received at a United States port and there reshipped to a foreign country without being entered as an import into this country.

In-transit and transshipment trade is not included in the imports and exports of the United States, but is reported separately.

VALUES.—The values of imported articles subject to *ad valorem* duties are defined by the Act of Congress of June 10, 1890, as—

The actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

The value of all other imports, whether subject to specific duty or free of duty, is also determined according to the law just quoted.

The value of domestic exports is their declared value at the time of exportation in the ports of the United States whence they are exported, which the law requires to be stated under oath with penalty for misstatement.

The value of foreign exports when shipped directly from bonded warehouses (usually dutiable goods) is their import value, but when not shipped from bonded warehouses (usually free goods) the value is determined in the same manner as that of domestic exports.

Goods in transit through the United States from one foreign country to another are valued in the same manner as imports.

Valuation deceptions.—The value of imported articles subject to *ad valorem* duties is believed to be determined with more accuracy, according to the legal method of valuation, than the value of imports with specific duties or free of duty, or the value of exported articles; the valuations of dutiable imports and of exports dutiable in foreign countries tend to understatement; and the valuations of imports that are free of duty are liable to inflation for the purpose of trade deception.

WEIGHTS.—In the official trade returns of the United States the weights of articles exported are usually net weights, and also the weights of all imports, except those which are subject to a specific duty levied upon the weight of the packages, including the weight of the article itself, together with some or all of its coverings.

All tons mentioned in this bulletin, except where it is otherwise stated, are long tons of 2,240 pounds.

IMPORTS OF FARM PRODUCTS, 1851-1908.

REVIEW OF FIFTY-EIGHT YEARS.

The imports of farm products into the United States during the fifty-eight years 1851-1908, shown in Table 1, increased nearly nine-fold, the value in 1851 being \$61,000,000 and in 1908 \$540,000,000. The average annual imports for the period 1851-1855 were \$69,000,000 and in each five-year period thereafter, to and including 1871-1875, there was an increase over the preceding period. The relatively small decrease to \$254,000,000 in 1876-1880 was followed by three successive increases in following five-year periods, then by a decrease to \$376,000,000, and again in 1901-1905 there was an increase, the average imports for this period being \$455,000,000. This average was exceeded in each year beginning with 1903, and so rapid was the increase that in 1905 and following years it was exceeded by \$84,000,000 to \$172,000,000.

During the earlier years of the period under discussion farm products constituted a much less important proportion of the imports into the United States than in the later years. This class of articles constituted 28 per cent of the total imports in 1851-1855 and 47 per cent in 1901-1905. In three of the five-year periods shown in Table 1, and in eleven of the individual years, more than one-half of the imports consisted of farm products. The last year in which farm products formed more than one-half the total imports was 1899. Owing to great increases in other imports, as measured by value, the relative imports of farm products were lower in 1908 than for any five-year average since 1871-1875.

The relative importance of imported farm products may be illustrated by a comparison with the value of some crops in the United States. The average annual imports of this class in 1901-1905 were larger than for any other five-year period shown in Table 1, amounting to \$455,000,000. This value, compared with the average December 1 value of the crops of 1901-1905, was nearly one-half the value of the corn, \$17,000,000 less than that of the wheat, and \$171,000,000 more than that of oats. Compared with the average annual exports of cotton, grain, and grain products for this five-year period, the average value of all farm products imported was \$74,000,000 less.

TABLE 1.—*Value of imports of farm products into the United States, 1851-1908, and comparison with total imports.*

^a The classification employed from 1890 to 1901 differs from the present classification by including prepared opium and (in 1896-1901) gelatine, but not cochineal, licorice root, nor (in 1891-1893) beer extract. The value of the products included in this table for 1890-1901, but not subsequently, was as follows: Prepared opium, 1890, \$269,586; 1891, \$567,035; 1892, \$347,528; 1893, \$446,422; 1894, \$310,771; 1895, \$920,006; 1896, \$735,134; 1897, \$1,132,861; 1898, \$652,341; 1899, \$828,203; 1900, \$1,065,965; 1901, \$972,582. Gelatine, 1896, \$15,386; 1897, \$5,748; 1898, \$25,907; 1899, \$21,961; 1900, \$30,361; 1901, \$23,230. The value of the products now included, but not in 1890-1901, was as follows: Cochineal, 1890, \$42,435; 1891, \$19,779; 1892, \$15,883; 1893, \$32,572; 1894, \$28,124; 1895, \$38,568; 1896, \$50,988; 1897, \$41,943; 1898, \$45,762; 1899, \$23,207; 1900, \$31,211; 1901, \$20,414. Licorice root, 1890, \$794,503; 1891, \$896,597; 1892, \$1,601,028; 1893, \$1,688,716; 1894, \$1,200,728; 1895, \$1,404,563; 1896, \$1,401,748; 1897, \$1,022,650; 1898, \$1,171,621; 1899, \$1,566,830; 1900, \$1,667,256; 1901, \$1,737,097. Beer extract, 1891, \$6,470; 1892, \$5,411; 1893, \$2,291.

TABLE 1.—*Value of imports of farm products into the United States, 1851-1908, and comparison with total imports—Continued.*

Year ending June 30—	Total.	Farm products.	Other than farm products.	Per cent of farm products of total.
1906.....	\$1,226,562,446	\$554,175,242	\$672,387,204	45.2
1907.....	1,434,421,425	626,836,808	807,584,617	43.7

1896-1900.....	741,518,883	376,369,368	365,149,515	50.8
1901-1905.....	972,162,558	455,432,200	516,730,358	46.8

QUANTITY IMPORTED PER CAPITA.

The average annual imports of coffee in 1851-1855 were more than 7 pounds per capita and in 1901-1905 a fraction over 12 pounds. The smallest per capita imports for any five-year period were 3.75 pounds in 1861-1865. The sugar imports averaged 17 pounds per capita in 1851-1855 and 46 pounds in 1901-1905. The average in this last period would be 12 pounds higher if the receipts from Hawaii and Porto Rico were included with imports, as they were prior to the annexation of these islands to the United States.

The quantity of tea imported per capita showed but little increase in fifty years, the average in 1851-1855 being 0.9 pound and in 1901-1905, 1.2 pounds. The quantity of cocoa and chocolate imported in 1851-1855 averaged less than 0.1 pound and in 1901-1905, 0.8 pound, or more than three-fifths of the corresponding average for tea. The quantity of coffee imported per capita in 1901-1905 was ten times that of tea, and sugar was nearly four times the quantity of coffee.

The unmanufactured tobacco imported in 1901-1905 averaged 6.16 ounces per capita, or twice the corresponding average for 1851-1855. Imports per capita of silk and wool increased greatly during the period under discussion. For 1883-1885, when the quantity first appears in the official returns, an average per year of 0.08 pound of raw silk was imported and in 1901-1905 the corresponding average was 0.2 pound. For wool, the average for 1851-1855 was 0.87 pound, and in 1901-1905 it had increased to 2.2 pounds.

RECENT TENDENCIES.

Comparing the five-year period 1896-1900 with 1901-1905, the per capita imports of silk increased from 0.15 to 0.2 pound; cocoa and chocolate, from 0.46 to 0.79 pound; coffee, from 10.4 to 12.2 pounds;

tea, from 1.2 to 1.22 pounds; and tobacco, from 4 to 6 ounces. Wool, on the other hand, decreased from 2.6 to 2.2 pounds and sugar from 53 to 46 pounds.

Comparing the individual years 1906, 1907, and 1908 with the averages for the five-year period 1901-1905, it will be seen in Table 2 that the quantity of silk imported in 1906 was larger than the average for the previous five-year period, that the quantity in 1907 was larger than that of 1906, but that 1908 was less than 1907; and the same was true of cocoa, chocolate, and sugar.

In wool and tobacco there were increases in quantity in 1906 over the previous five-year period followed by successive decreases in 1907 and 1908, each under the preceding year. The per capita weight of coffee imported in 1906 was less than the average for 1901-1905, the imports in 1907 were greater than in 1906, and there was a decline in 1908 under the preceding year. The per capita quantity of tea imported decreased in 1906 under the five-year average of 1901-1905, a further decrease occurred in 1907, and in 1908 the per capita imports increased to an amount above that of 1907, but less than that of 1906 and the average for 1901-1905.

PER CAPITA VALUE OF IMPORTS.

A considerable part of the agricultural imports are, in consumption, distributed widely throughout the country. Three articles of common household use, namely, sugar, tea, and coffee, constituted in 1851-1855 more than one-half the total imports of farm products and in 1901-1905 considerably more than one-third. The per capita value of all farm products imported in 1851-1855 averaged \$2.71 and in 1901-1905 \$5.67 per year. This increase of \$2.96 per capita was due to silk, 55 cents; packing-house products, 55 cents; vegetable fibers, 45 cents; sugar, 40 cents; coffee, 28 cents; wool, 20 cents; tobacco, 18 cents; all fruits, 17 cents; cocoa and chocolate, 10 cents; vegetable oils, 7 cents; making a total of \$2.95, the net increase of all other items amounting to only 1 cent.

The most important articles and groups of articles may be divided into four classes based upon the relative increase or decrease in the value imported per capita. The first class includes articles whose per capita increase in value from 1851-1855 to 1901-1905 was more than fivefold. The value of silk imported in 1851-1855 averaged 2.7 cents per capita and 57.2 cents in 1901-1905; cocoa and chocolate, 0.5 cent in the first period and 10.3 cents in the last; tobacco, 2.7 and 20.8 cents, respectively, and vegetable fibers, 7.9 and 52.8 cents.

The class next in order includes articles whose increase per capita was less than fivefold, but at least threefold. Packing-house products increased from 27.1 cents in 1851-1855 to 81.9 cents in 1901-1905; all fruits, from 5.8 to 22.7 cents; and all nuts, from 1.4 to 5.9 cents per capita.

Increases of less than threefold determine the articles in the third class. Coffee imports in 1851-1855 averaged yearly 58 cents per capita and 86.4 cents in 1901-1905; vegetable oils, 5 and 11.9 cents; wool, 10.5 and 30.7 cents; and sugar 56.1 and 96.3 cents per capita.

The last class here specified, the fourth, consists of imports whose per capita value decreased in the period under discussion. The principal item of this class is tea, which decreased from 26.6 to 17.5 cents.

TABLE 2.—*Total and per capita imports of principal farm products into the United States, 1851-1908, by five-year periods.*

^a Average, 1867-1870. Average population for this period, 37,375,000.

AVERAGE IMPORT VALUES.

The value of an imported article, as stated in the official trade returns of the United States, is the actual market value in the country from which imported, and does not include subsequent charges and profits. Changes in the average import value of a given article from one year to another may be due to changes in the prices of the same grades or to varying proportions of different grades imported under the name of the article, or to both. Owing to the uncertainty caused by these influences, comparisons based upon average import values should be made with caution.

In order to secure more uniformity in the grade of a number of articles whose average value is shown in Table 3, imports from individual countries have been taken in many cases. In 1851 the average values of imports of cheese from Canada, France, and Italy were not widely different, the lowest being 8.5 cents for Italy and the highest 9 cents for France. During the ten years ending with 1908 the average value of cheese from France was generally higher than that from the other three countries mentioned in Table 3, and the value of that from Switzerland was generally lower.

Of raw silk the imports from Italy during the period shown in Table 3 were regularly higher in average value than those from China and Japan, while Japanese silk was higher than Chinese.

During 1851-1860 coffee from Brazil was valued sometimes as high as or even higher than that from the Dutch East Indies, but in 1901-1908 Brazilian coffee had an average import value of about one-half that from the Dutch East Indies. Coffee from Guatemala was also much higher than that from Brazil and almost equaled in average import value the product of the Dutch East Indies. The average value of Cuban molasses has regularly been much less than that of Porto Rican.

Of the raw cane sugar, that from Hawaii has had with few exceptions a higher value than that from Cuba, and the imports from the Philippine Islands have been usually about the same in average value as those from the Dutch East Indies, especially during 1906-1908.

The average import values of tea from Japan during 1899-1908 were in each year higher than those from the British East Indies and the Chinese Empire, but in earlier years there was considerable variation in the relative values of the imports from these three countries.

Cuban leaf tobacco intended for cigar wrappers has usually had a higher average import value than leaf tobacco for the same purpose imported from the Netherlands, most of which came originally from the Dutch East Indies; and other leaf tobacco from Cuba was usually valued higher than the corresponding kind imported from Asiatic and European Turkey.

Potatoes from Germany and the United Kingdom have been generally higher in price at the place of shipment than those imported from Canada, but in 1907 the imports from Canada were valued at an average of 52.4 cents per bushel, from Germany 50.7 cents, and from the United Kingdom 65.3 cents.

The long-staple cotton from Egypt and Peru is higher in price than the cotton of India, and the Egyptian cotton, especially since 1902, has been higher than the Peruvian. Imports from British Australasia of wool of Class 1, known as clothing wool, have had for at least twenty-five years a higher average value than that imported from Argentina.

Considerable fluctuations have taken place in the average import values of wool of Class 3, or carpet wools. In 1901 the average value of these imports from European Russia was higher than those from Argentina, the Chinese Empire, or Asiatic Turkey, and in 1904 imports from Russia and Asiatic Turkey were rated the same and exceeded those from Argentina and the Chinese Empire. In 1907 the average value of imports of this class of wool from Argentina exceeded averages for the other three countries, and in 1908 the highest average of the four was for the imports from Asiatic Turkey.

Italian oranges, beginning with 1900, when returns for average values were first made, have always been higher in average value than those from the British West Indies. Walnuts from France have been higher than those from Italy for the six years for which figures are available.

Some marked changes have taken place in the average import values of certain articles from certain countries during the fifty-eight years covered by Table 3. The average values of cheese from Canada, France, and Italy increased from about 9 cents per pound in 1851 to about 19 cents in 1908; pepper from all countries from 3.5 cents in 1851 to 7.5 cents in 1908, and potatoes from Canada were in 1908 nearly two and one-half times the average value in 1851. Another important increase in average value was that of manila fiber from the Philippine Islands, which in 1862, the first year for which figures are given, was considerably less than one-half the average value in 1908.

Of the more striking decreases in average import values three may be noted. Nutmegs from all countries had an average value at the ports of shipment of 63.4 cents per pound in 1851, and only 11.6 cents per pound fifty-seven years later. Starch from all countries, which in 1851 was valued at 5.4 cents per pound, was rated at 3 cents less in 1908, and molasses from Cuba and Porto Rico were in the earlier years more than three times the values given in the last year of the table.

TABLE 3.—Average import values of selected farm products, 1851-1908, by principal countries from which consigned.

[All values are gold.]

Year ending June 30—	Cheese.				Silk, raw, or as reeled from the cocoon.			Coffee.			Choco- late.

^a Imports from "Turkey in Africa," 1883-1891.

TWO CLASSES OF IMPORTS.

The items of imports shown in Table 4 include a number of articles that are competitive with the products of United States farms; among the most important of these items are sugar, tobacco, hides and skins, hay, and bristles. Products of this class make up an amount of nearly one-half the value of the total imports of farm products.

With the products of distinctively foreign character among the agricultural imports of the United States may be classed those which, although introduced into cultivation in this country, have not yet assumed commercial importance. The imports of agricultural products little if at all produced in contiguous United States include chiefly silk, coffee, tea, sisal grass, manila fiber, jute, Peruvian and Egyptian cotton, bananas, and cocoanuts.

TABLE 4.—*Quantity and value of imports of farm products into the United States, 1851-1908.*

[Where no figures are expressed in this table, a footnote to the column head, or to lines in the body of the table, states, when possible, in what other column of the table they are included. In the absence of footnote, there may or may not have been imports, the fact now being unascertainable. Figures for 1860-1863 were taken from a summary statement in Commerce and Navigation, 1863, showing greater detail than the regular annual statements. In 1855-1859 figures for imports from Canada and Newfoundland under reciprocity treaty were taken from Executive Document No. 106, 53d Congress, 2d session. All values are gold.]

- No. 26.—Wages of Farm Labor in the United States. Results of Twelve Statistical Investigations, 1866-1902. 1903. Price, 5 cents.
- No. 27.—Wheat Production and Farm Life in Argentina. 1904. Price, 10 cents.
- No. 28.—The Commercial Cotton Crops of 1900-1901, 1901-1902, and 1902-1903. 1904. Price, 5 cents.
- No. 29.—Methods and Routes for Exporting Farm Products. 1904. Price, 5 cents.
- No. 30.—International Sugar Situation. Origin of the Sugar Problem and Its Present Aspects under the Brussels Convention. 1904. Price, 10 cents.
- No. 31.—Imports of Farm and Forest Products, 1901-1903, by Countries from which Consigned. 1905. Price, 5 cents.
- No. 32.—Exports of Farm and Forest Products, 1901-1903, by Countries to which Consigned. 1905. Price, 5 cents.
- No. 33.—Trade with Noncontiguous Possessions in Farm and Forest Products, 1901-1903. 1905. Price, 5 cents.
- No. 34.—The Commercial Cotton Crop of 1903-1904. 1905. Price, 5 cents.
- No. 35.—Imports of Farm and Forest Products, 1902-1904, by Countries from which Consigned. 1905. Price, 5 cents.
- No. 36.—Exports of Farm and Forest Products, 1902-1904, by Countries to which Consigned. 1905. Price, 10 cents.
- No. 37.—Trade with Noncontiguous Possessions in Farm and Forest Products, 1902-1904. 1905. Price, 5 cents.
- No. 38.—Crop Export Movement and Port Facilities on the Atlantic and Gulf Coasts. 1905. Price, 5 cents.
- No. 39.—Meat in Foreign Markets, Tariffs of Fourteen Importing Nations, and Countries of Surplus. 1906. Price, 5 cents.
- No. 40.—Meat Animals and Packing-house Products Imported into Eleven Principal Countries, 1895-1904. 1906. Price, 5 cents.
- No. 41.—Norway, Sweden, and Russia as Markets for Packing-house Products. Imports from Principal Countries, 1895-1904. 1906. Price, 5 cents.
- No. 42.—Russia's Wheat Surplus; Conditions under which it is Produced. 1906. Price, 20 cents.
- No. 43.—Changes in Farm Values, 1900-1905. 1906. Price, 10 cents.
- No. 44.—Local Conditions as Affecting Farm Values, 1900-1905. 1906. Price, 10 cents.
- No. 45.—Imports of Farm and Forest Products, 1903-1905, by Countries from which Consigned. 1906. Price, 10 cents.
- No. 46.—Exports of Farm and Forest Products, 1903-1905, by Countries to which Consigned. 1906. Price, 10 cents.
- No. 47.—Trade with Noncontiguous Possessions in Farm and Forest Products, 1903-1905. 1906. Price, 10 cents.
- No. 48.—The Cost of Producing Farm Products. Methods of Investigation. Cost of Growing Minnesota Field Crops, 1902, 1903, 1904. 1906. Price, 15 cents.
- No. 49.—Costs of Hauling Crops from Farms to Shipping Points. 1907. Price, 10 cents.
- No. 50.—Hops in Principal Countries: Their Supply, Foreign Trade, and Consumption, with Statistics of Beer Brewing. 1907. Price, 10 cents.
- No. 51.—Foreign Trade of the United States in Forest Products, 1851-1908. 1909. (In press.)
- No. 52.—Imports of Farm and Forest Products, 1904-1906, by Countries from which Consigned. 1907. Price, 10 cents.
- No. 53.—Exports of Farm and Forest Products, 1904-1906, by Countries to which Consigned. 1907. Price, 10 cents.
- No. 54.—Trade with Noncontiguous Possessions in Farm and Forest Products, 1904-1906. 1907. Price, 10 cents.
- No. 55.—Meat Supply and Surplus, with Consideration of Consumption and Exports. 1907. Price, 15 cents.
- No. 56.—Corn Crops of the United States, 1866-1906. 1907. Price, 10 cents.
- No. 57.—Wheat Crops of the United States, 1866-1906. 1907. Price, 10 cents.
- No. 58.—Oat Crops of the United States, 1866-1906. 1907. Price, 10 cents.
- No. 59.—Barley Crops of the United States, 1866-1906. 1907. Price, 10 cents.
- No. 60.—Rye Crops of the United States, 1866-1906. 1908. Price, 10 cents.
- No. 61.—Buckwheat Crops of the United States, 1866-1906. 1908. Price, 5 cents.
- No. 62.—Potato Crops of the United States, 1866-1906. 1908. Price, 10 cents.
- No. 63.—Hay Crops of the United States, 1866-1906. 1908. Price, 10 cents.
- No. 64.—Number and Farm Value of Farm Animals in the United States, 1867-1907. 1908. Price, 15 cents.
- No. 65.—Russia's Wheat Trade. 1908. Price, 15 cents.
- No. 66.—Russian Wheat and Flour in European Markets. 1908. Price, 15 cents.
- No. 67.—Ocean Freight Rates and the Conditions Affecting Them. 1907. Price, 10 cents.
- No. 68.—Cereal Production of Europe. 1908. Price, 5 cents.
- No. 69.—European Grain Trade. 1908. Price, 10 cents.
- No. 70.—Imports of Farm and Forest Products, 1905-1907, by Countries from which Consigned. 1908. Price, 10 cents.
- No. 71.—Exports of Farm and Forest Products, 1905-1907, by Countries to which Consigned. 1908. Price, 10 cents.
- No. 72.—Agricultural Imports of the Netherlands. 1909. Price, 10 cents.
- No. 73.—The Cost of Producing Minnesota Farm Products, 1902-1907. 1909. Price, 15 cents.
- No. 74.—Imports of Farm Products into the United States, 1851-1908. 1910. Price, 15 cents.
